Classification: Internal

Hi Chris - thanks for these -
However -

- 1) HEOC declined the access in wk25 as this clashes with a Piccadilly line closure east of Northfields, so no direct route to central London is available all weekend, thus Pax No's are expected to be higher than the 6 vice 10 tph is likely to be able to accommodate.
Can Network Rail demonstrate where this has been considered in any decision criteria / capacity allocation statement (which I don't think has been issued).
- 2) HEOC have NOT been consulted on nor agreed to any change in their WTT departure times. Whilst XX.22/XX.52 has been used previously that was for specific weeks, agreement has not been sought nor given to change these in these weeks.
- 3) As per Network Code D3.4.7 - Network rail shall provide to each TT participant by **TW-30 its proposals for Restrictions of Use in respect of the corresponding TT week** (*& can be amended or supplemented & be provided to TT Participants prior to TW-26.*)
This has clearly been received outside of these timescales.

As such I believe Network Rail has failed under its obligations as defined within the Network Code & HEOC ask that Network rail either withdraw / amend these studies.

Please note that a similar response will be sent for any subsequent study issued by Network Rail where HEOC believes the conditions as defined within NC Part D have not been met.

HEOC remains available to discuss this issue with Network rail to seek a resolution.

Regards.

Paul.

OFFICIAL

Hi All,

Please find attached the Week 26 and Week 30 Sunday capacity studies for the HS2 2-tracks.

Week 26 - P2024/3767989

Week 30 - P2024/3767992

This is considered to be the final version.

Please respond with any comments to the EAP Western Inbox.

Regards
